WHO WE ARE

The organizing party

FTSGROUP builds innovation ecosystems.

We engage incumbents, investors, entrepreneurs, technology partners, and regulators to build trusted and connected FinTech tribes around the world. We firmly believe that innovation in Financial Services will improve people's lives.

Through our immersive programs, we connect global industry experts with local financial services communities to explore, challenge and solve important issues related to FinTech, RegTech, InsurTech, Artificial Intelligence, Identity & Financial Inclusion.

The good news is that we have done it before. Innotribe was the first and largest FinTech movement worldwide and our founders were amongst its orchestrators. We build programs with a wise combination of Formats, Partnerships, and Content.

It is experience-based, tailor-made and proven to deliver results.

HOW WE DO IT

Our event network

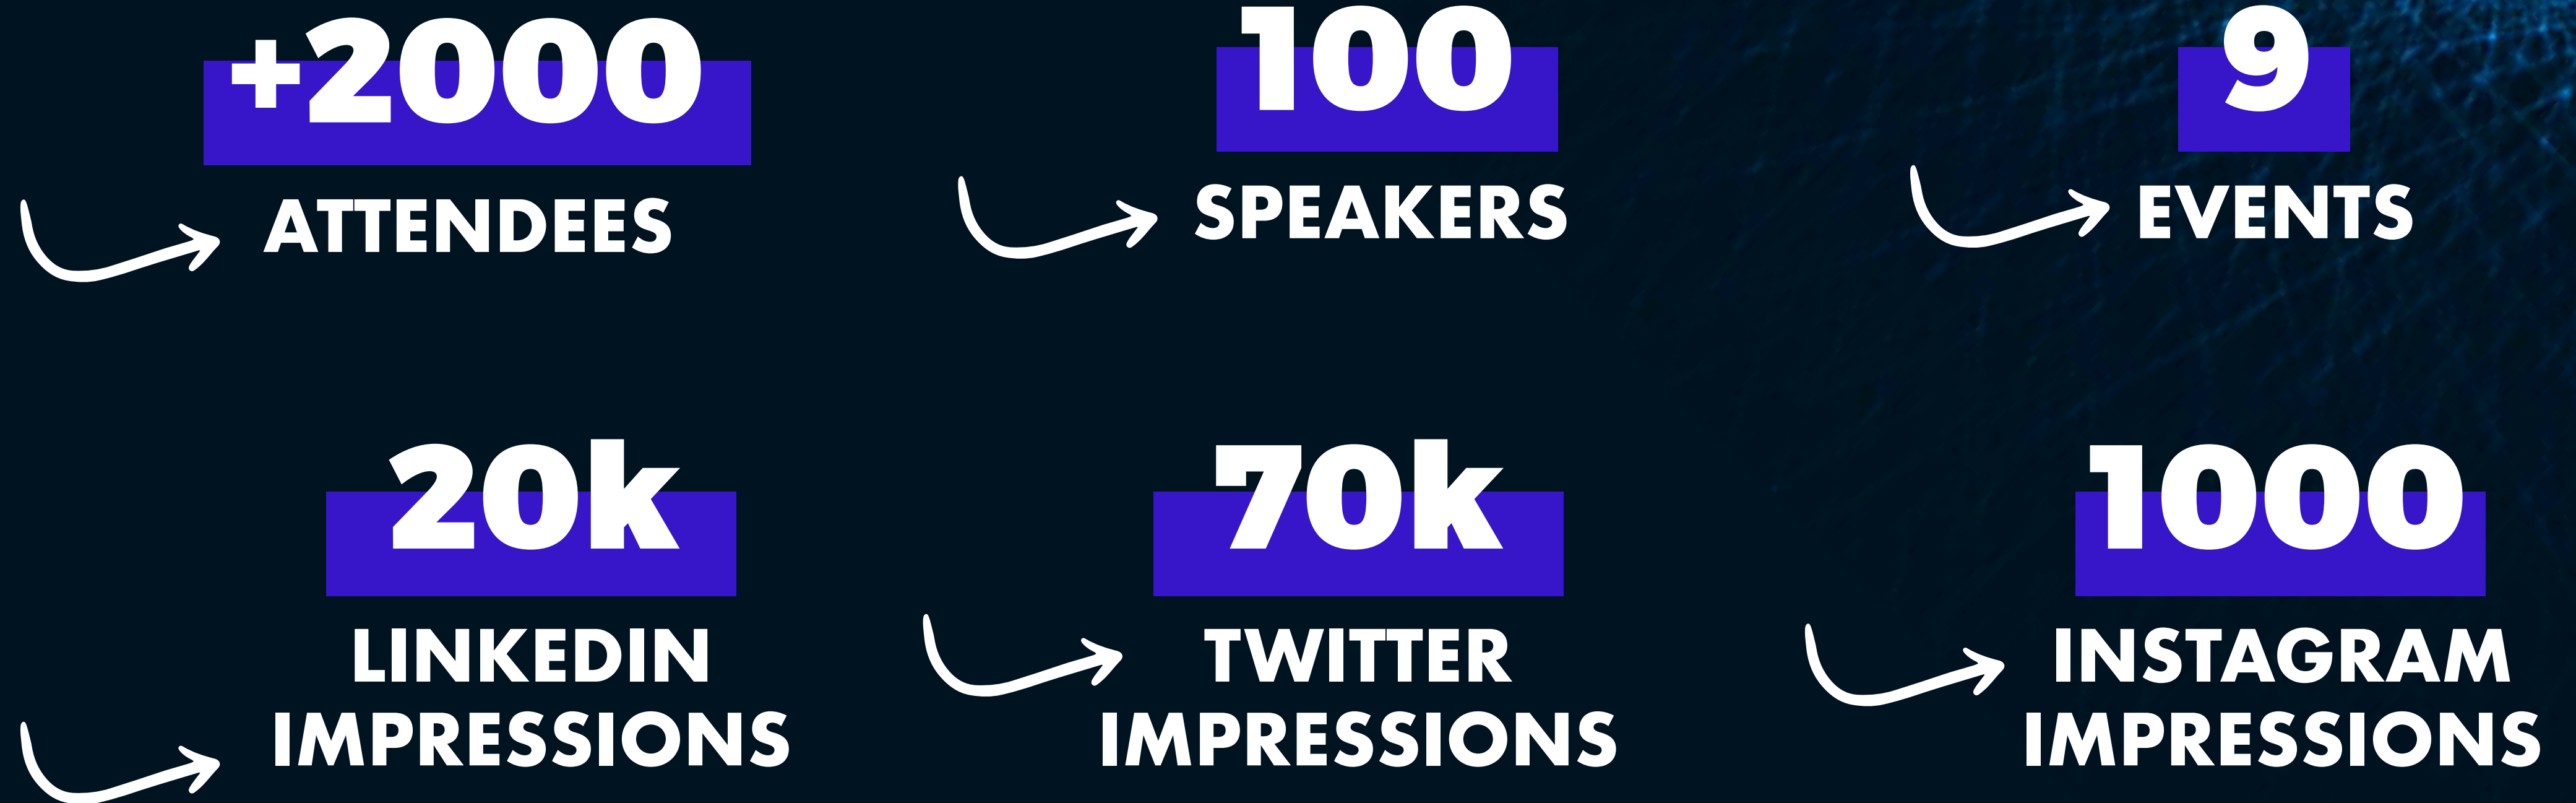

We create, extend and connect ecosystems through events, startup challenges, and hackathons.
